

****Asia Range Scalp Strategy**

1. Asia Range Definition

- **Time:** 7:00 pm – 12:00 am NY time.
 - **Conditions:**
 - **Must show low volatility, low volume, and clear consolidation.**
 - **Total range must not exceed 30 pips.**
 - **If the Asia range expands beyond 30 pips → no trade for this model.**
-

2. Sweep Conditions (NY Midnight → After)

After NY Midnight opens:

Valid Asia Sweep

A sweep is valid only if:

- **Price raids Asia High or Asia Low, AND**
- **Extends 1–20 pips beyond that high/low.**

Invalid Sweep

Reject the setup entirely if:

- **Extension > 20 pips**
- Treat as displacement / trend expansion, NOT a sweep.**

The Asia sweep must occur:

- **Soon after NY Midnight Open, or**
- **Within the first 2 hours of LOKZ (London Kill Zone).**

This means:

- **If the sweep happens late in London, or**
 - **After 2 hours into LOKZ, or**
 - **Later into the session (NY AM)**
-

3. Post-Sweep Confirmation (5min Chart)

Entry Trigger

After the sweep occurs:

1. **Wait for a 5-minute candle to close back inside the Asia Range.**
 - **This candle should create a 5m FVG (Fair Value Gap) as it re-enters the range**
 - **The FVG represents your displacement back into the range.**
 2. **The FVG must be inside the Asia range.**
 - **If the FVG sits entirely outside the range → reject.**
-

4. Trade Execution

Entry

- **Enter immediately at the close of the 5-minute candle that:**
 1. **Closes back inside the Asia Range, AND**
 2. **Creates a valid 5m FVG during that move back into the range.**

Stop Loss

- **Place SL just beyond the sweep extreme (above/below the sweep wick).**
- **NOT at Asia high/low — at the actual sweep wick.**

Target

- **Target the opposite side of Asia liquidity:**
 - **If Asia low was swept → target Asia high.**
 - **If Asia high was swept → target Asia low.**

Stop Loss

- **Risk per trade is always fixed at 1% of account equity.**
- **SL is still placed beyond the sweep wick, but position size must be adjusted so that the total risk = 1%.**

Reward Requirement

- **Minimum acceptable RR = 1.5R.**
- **If the opposite-side Asia liquidity does not offer at least 1.5R, the setup is invalid and must be skipped.**

SL - 0.5pip

5min FVG - 3 candle gap on 5min chart, enter just after 5min candle close that confirmed the gap

Sweep timing - 00.00-04.00 NY time

Position size - we would have to build in proper position size calculator as SL will never be set pips, always different , but it's always 1%
